

## ORCAadapt Complete Light Pipe System

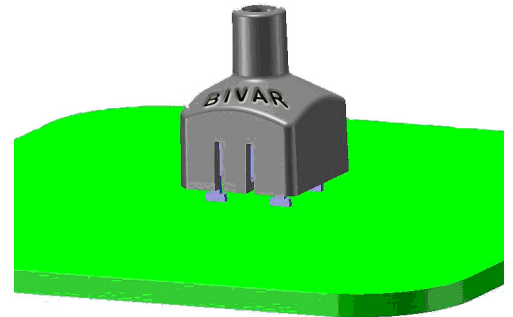

Bright, Durable, and Flexible

**ORCAadapt (1MM & 2MM SERIES):** Bivar's ORCAadapt solution consists of an ORCA adapter with a built in ORCA Super Flux LED and a flexible light pipe system available in 1mm and 2mm size options. The ORCAadapt unites the well-known brightness and durability of the ORCA Super Flux LED with the optimized light transmission and customized routing of Bivar's flexible light pipe systems.

### FEATURES

- Available in lengths from 2.5" to 238'.
- LED has 7.6mm square package form factor.
- ORCA LED available in single, bi-color and tri-color.
- Input driven color adjustment capabilities.
- Multiple Lens Configurations.

**APPLICATIONS:** The ORCAadapt system is ideally suited for applications that require more visible indication, greater luminous intensity and higher power efficiency. ORCA LEDs offer a wide range of color choices which are typically required in the following applications:

- Automotive
- LED Signs and Signals
- Decorative and Specialty Lighting
- Outdoor Test & Measurement Equipment
