The Most Comprehensive Family of Card Guides Immediately Available

Vertical Card Guides Save Space

- Designed for 1/16", 3/32" and 1/8" PCBs
- Available in your choice of popular styles and lengths

CPCI Card Guides

- Built-in card retention features
- Molded from glass filled polycarbonate for ultimate security and durability
- Designed in compliance with IEEE 1101.10 and PICMG 2.16

Horizontal Card Guides Reduce Inventory, Increase Board Space

- Available in single- and dual-sided Horizontal Card Guides
- Enable 1/16" PCBs to be mounted parallel to existing boards or onto metal drawers, metal plates and enclosures
- Only three guides are required for twin-board installations

Conductive, Press-In Card Guide

- UL Rated 94V-0 precision molded nylon is strong and economical
- Available in a wide selection of lengths to cover most standard and custom subrack depths
- Pre-installed clips provide integrated grounding contact from the PCB to chassis

Immediate Worldwide Availability

With our extensive network of authorized distributors around the world, you can be guaranteed a quick response and immediate delivery for all standard Bivar products.

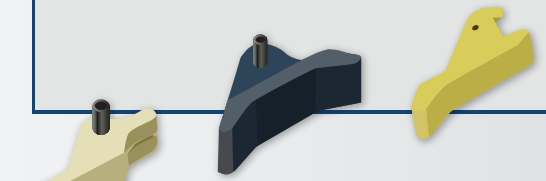

The World's Largest Selection of Cost-Saving Solutions

Card Ejectors, Inserter/Extractors & Handles Give You the Edge

- Bivar card guide ejectors prevent undue stress on your components, circuitry, connectors, PCBs and support systems through their lever action
- Exceptionally strong
- Designed to solve tough problems associated with large PCBs and tight-gripping multi-pin edge connectors

Designed for high-vibration environments and to prevent undue stress on circuit cards.

UL Rated
94V-0, 94V-2
Materials

✓ High Quality, Low Cost

✓ Trouble Free Installation

✓ Unmatched Versatility

✓ Proven Reliability
